Sr. PAUL, July 13.-A few moments before 3 o'clock this afternoon clouds which carried 100 of this number, and the terrible appearance of a cyclone.

Hundreds of citizens watched the clouds as they swept together and foilowed their course to the northwest, in which direction many of their friends had gone to spend the day at some of the many little lakes scattered over the country.

Anxiety for the absent ones drew many down town during the evening to learn the first possible particulars of what was thought to be undoubtedly a disastrous storm.

MR. CHAIRMAN, LADIES AND GENTLEMEN-AS I have been called on to say something today am only too glad of an opportunity to say a few words in behalf of the "Patriotic Sons of a few words in behalf of the "Patriotic Sons of America" upon this glorious occasion. Our order has been grossly misrepresented when it has been stated that we are opposed to foreigners. We are only opposed to the immi-gration to this country of paupers and crimi-nals. To those who come to this country to be-come respectable and law-abiding citizens we, the "Patriotic Sons," are ready to extend the right hand of friendship, and welcome them to our shores.

right hand of friendship, and welcome them to our shores.

The great principles that we strive to inculcate in the minds of all citizens are patriotism, charity and fraternity, believing, as we do, that free education is the basis of national liberty. We advocate a free school system which disseminates no prejudices, rears no bigots, nor digupt the buried ashes of no old superstitions nor excludes a man because of his religious or political opinions. We consider it our duty to uphold the public schools of our country against open or secret foes, and to oppose all who would unite church and State These are principles that are worthy of all people of America. We must have education to enable us to properly understand our duty as citizens of a free country. Free education is one of the peculiar glories which Americans hold very precious. See to

other than tear or excitement. Not so with the engineer, however. He saw the threatening aspect of the sky and with a startled look ahead to see if all was clear, pulled out the throttle, and the engine leaped forward. His judgment and quick action undoubtedly saved the lives of a trainload, for the turning, twisting terrific devastator crossed the tracks scarcely more than a minute after the train passed.

Help that has been called for from the stricken districts was at once sent to them, doctors and other assistance going as fast as they could be taken.

The bodies of those mentioned were brought to the city this evening and turned over to their friends.

"I meant just what I said," emphatically stated Joe Alexander, last evening, in response to an inquiry from a REPUB-LICAN reporter, relative to his views on the vetoed railroad subsidy bill. said the reporter. "No, Sir! My position is this: I fully appreciate the benefit that a railroad to Prescott would be to us and wish it built; I believe in the proposition that the County should give a subsidy of \$4,000 a mile, but also believe that the right to build that road should be given to the first comer who puts up his money and agrees to the conditions. I have all along been an ardent supporter of the railroad scheme. I helped it through the Supervisors and assisted in the election, and when the news came of the veto, still under the impression that the bill passed by Congress was the bill ratified by the vote of the people of Maricopa county, I at once instituted measures to help to carry it over the veto. It was only when I learned of the fact that an en tirely strange bill had been palmed off on Congress that I kicked.
